

MUHAMAD IHSAN RAMADHAN

ihsanramadhan011104@gmail.com | <https://www.linkedin.com/in/ihsan-ramadhan> | ihsan.nochoicehub.com
Cikarang Utara Kab.Bekasi

I am an active Information Technology student with a strong passion for learning and developing cutting-edge technologies. I possess strong analytical skills, am able to work both in teams and independently, and am accustomed to facing challenges in a dynamic environment. I am interested in programming, data analysis, and cybersecurity. I continue to develop my technical and soft skills through campus projects, student organizations, and independent training.

Education

Universitas Presiden - Cikarang, Indonesia	Aug 2023 -Present
Candidate Bachelor of Science in Computing, 3.64/4.00	
• Honors: 75% Reduction Scholarship for 9 Semesters at President University • Organization: Active as a member of the Human Research Division at DiverVenture	

Achievements & Other Experience

- **Web Portfolio** (2024): Built a personal portfolio website using ReactJS, Vite, and TailwindCSS. Focused on responsive and interactive design, including a dynamic feature to display tools based on selected skills. Deployed via Hostinger and managed using Git & GitHub.
- **Water Management System** (2024): Built a web-based system to record and display water usage using HTML, CSS, JavaScript, and Firebase Realtime Database. Focused on input forms, data tracking, and automatic water calculations. This project strengthened my skills in real-time CRUD operations, cloud database usage, and UI design.
- **Cybersecurity Risk Assessment** (2025): Developed a web-based system for assessing cybersecurity risks using the Flask framework and MySQL. The project follows the NIST SP 800-30 Rev.1 guidelines, allowing users to input assets, threats, and vulnerabilities, then automatically calculate risk levels based on predefined parameters. I designed the database schema, implemented dynamic risk logic, and built a user-friendly interface. This project reflects my skills in Flask development, database integration, and understanding of cybersecurity risk management.
- **Pramusaku - Digital Scout Handbook** (2025): Developed an educational web app using ReactJS and Firebase. Designed to present scouting materials in a structured and user-friendly digital format, featuring content management and smooth navigation..
- **Disnaker - Web Profile** , (2025): Developing a government web application using ReactJS, Vite, and Tailwind as the frontend, and Nodejs and MongoDB as the backend. Designed to help digitize government employment services so they can be easily accessed anywhere in a structured and user-friendly digital format, with content management features, services provided, and smooth navigation.
- **ERPNext System Implementation** (2026): Worked on implementing and maintaining an ERP system using ERPNext to support company operations. Responsible for system setup, backup and restore processes, and troubleshooting system issues.

Work Experience

• Dinas Komunikasi, Informatika, Persandian dan Statistik (Diskominfoantik) Kabupaten Bekasi - Developer Intern	September 2025 - December 2025
• Taharica Group - ERP Developer Intern	January 2026 - April 2026

Skills

- **Frontend:** HTML5, CSS3, JavaScript, React.JS, Vite, TailwindCSS, Flask (Python Web Framework)
- **Backend & Database:** Firebase Realtime Database (Cloud-based CRUD operations), MySQL (Relational database design and queries), Backend logic implementation (Risk assessment, data processing),Node.js, MongoDB
- **Cybersecurity:** digital forensics,threat intelligence
- **Tools & Platforms:** Android Studio,Vscode,Autopsy,OSINT,Github,Oracle Virtualbox,Linux,Figma
